

my taste in movies

JANUARY 2024

data

exported rating list
from IMDb

additional preparation

manual adding the
countries of origin and
the directors' genders

tools

R (main)
Excel (for
add. prep.)

tasks of the research:

- **main:** give an overview of my watching tendencies through the years (2018-2023)
- **subsidiary:** provide separate brief stats on my 2023 viewings

limitations

- **lack of available data:** *sources, such as IMDb and Letterboxd, have very strict policies even for non-commercial usage. So, datasets that are possible to export provide very limited data*
- **generalizability:** *though the sample size is pretty big, not all the conclusions from the analysis are representative*
- **applicability of research** 😊

my rating system

10★ extraordinary

9★ made me emotional

8★ very good

7★ pretty good

6★ okay... but

5★ meh.. but can see why others like it

4★ don't like it but technically good

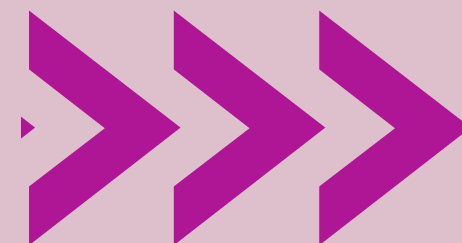

3★ hate it

2★ really hate it

1★ at least you tried...

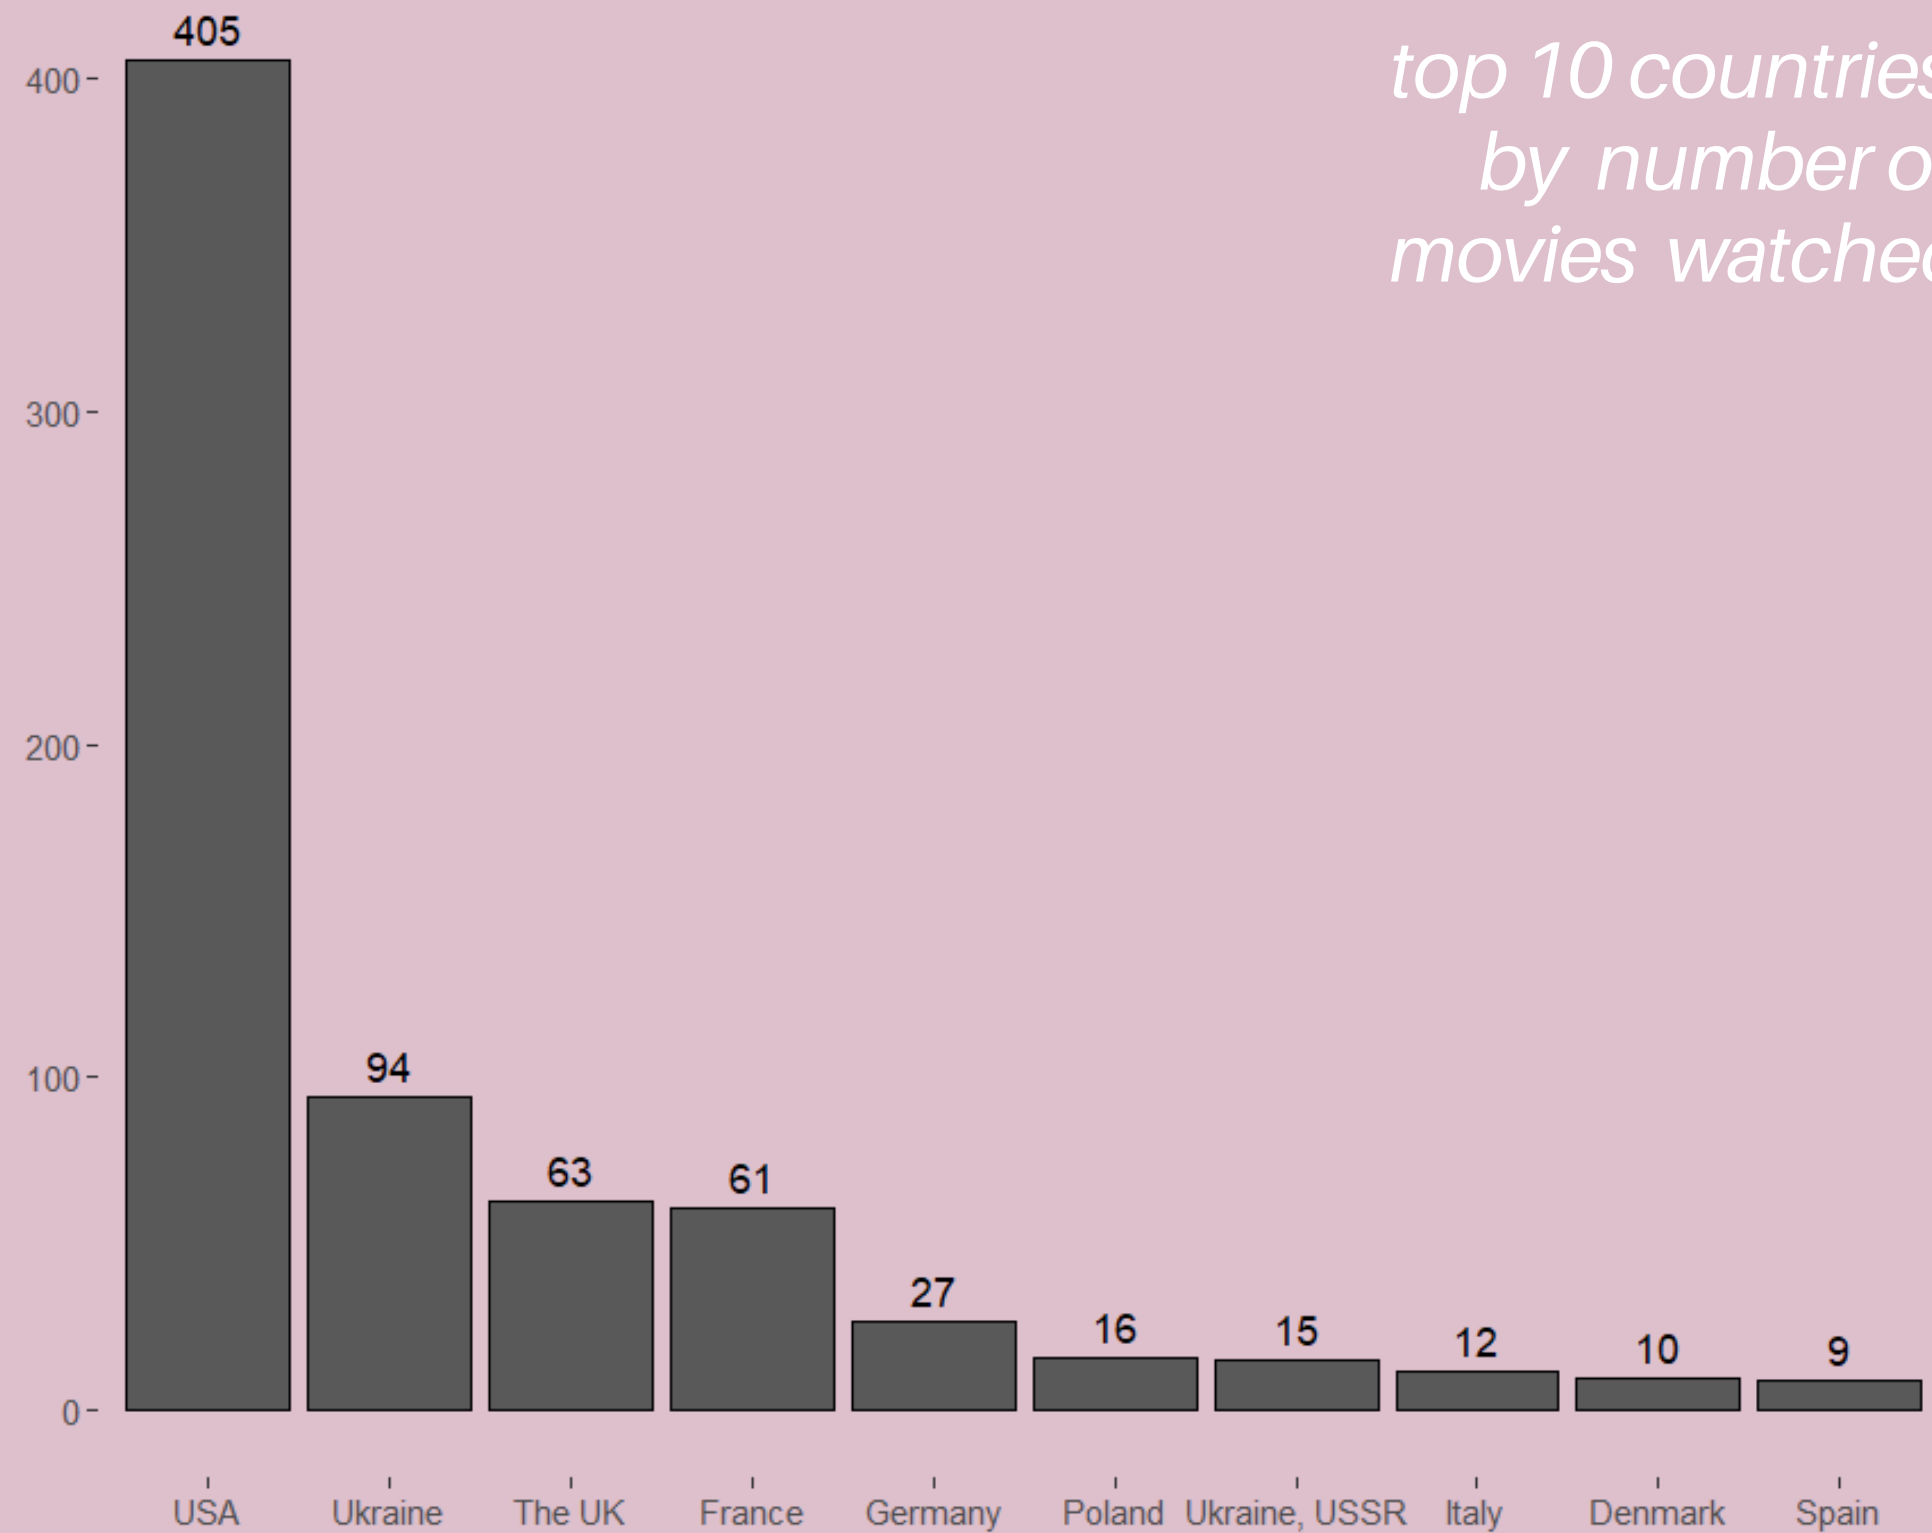

the analysis

781
movies watched

*from 12/10/18
to 31/12/23*

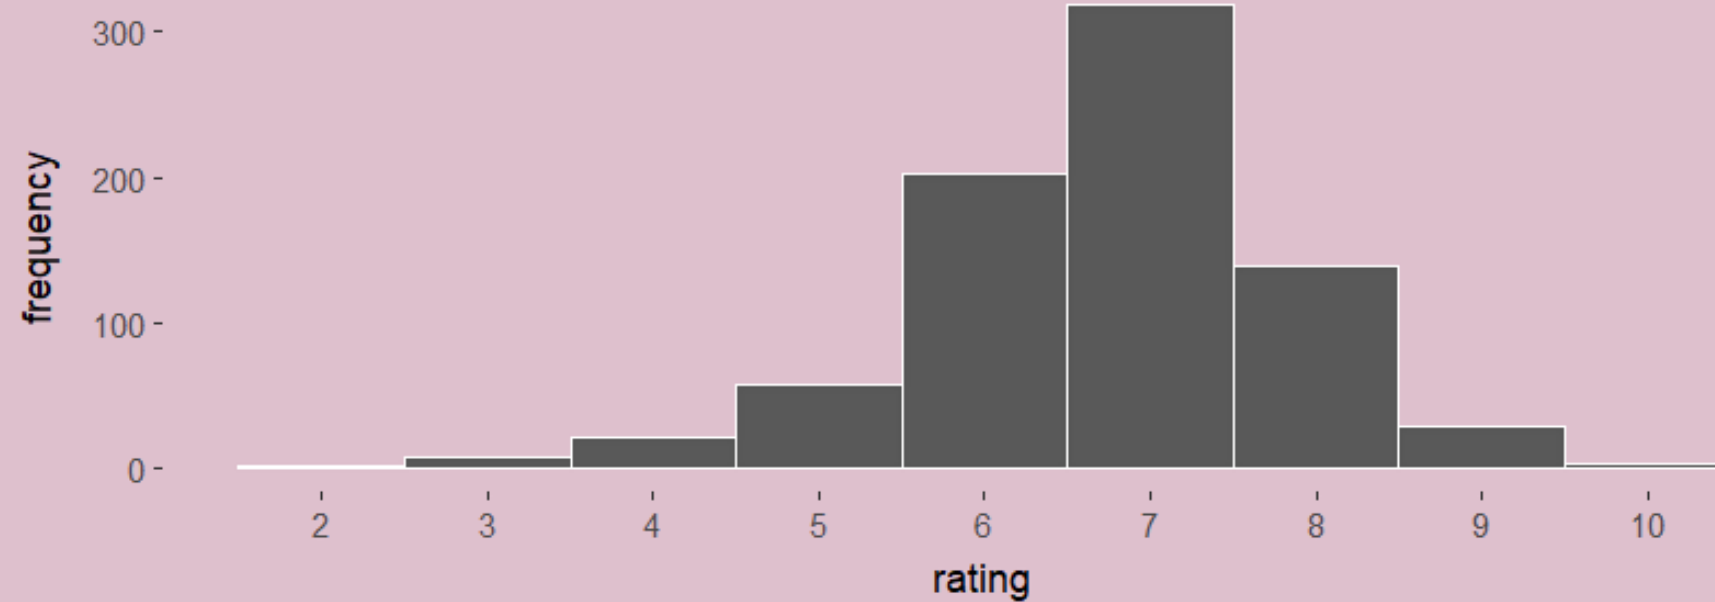

from
40
countries

top-rated countries

*data was filtered to analyze only the countries
which I watched at least 3 movies of*

my ratings distribution

1. Hungary

7.5

2. Hong Kong

7

3. Poland

6.94

4. The UK

6.94

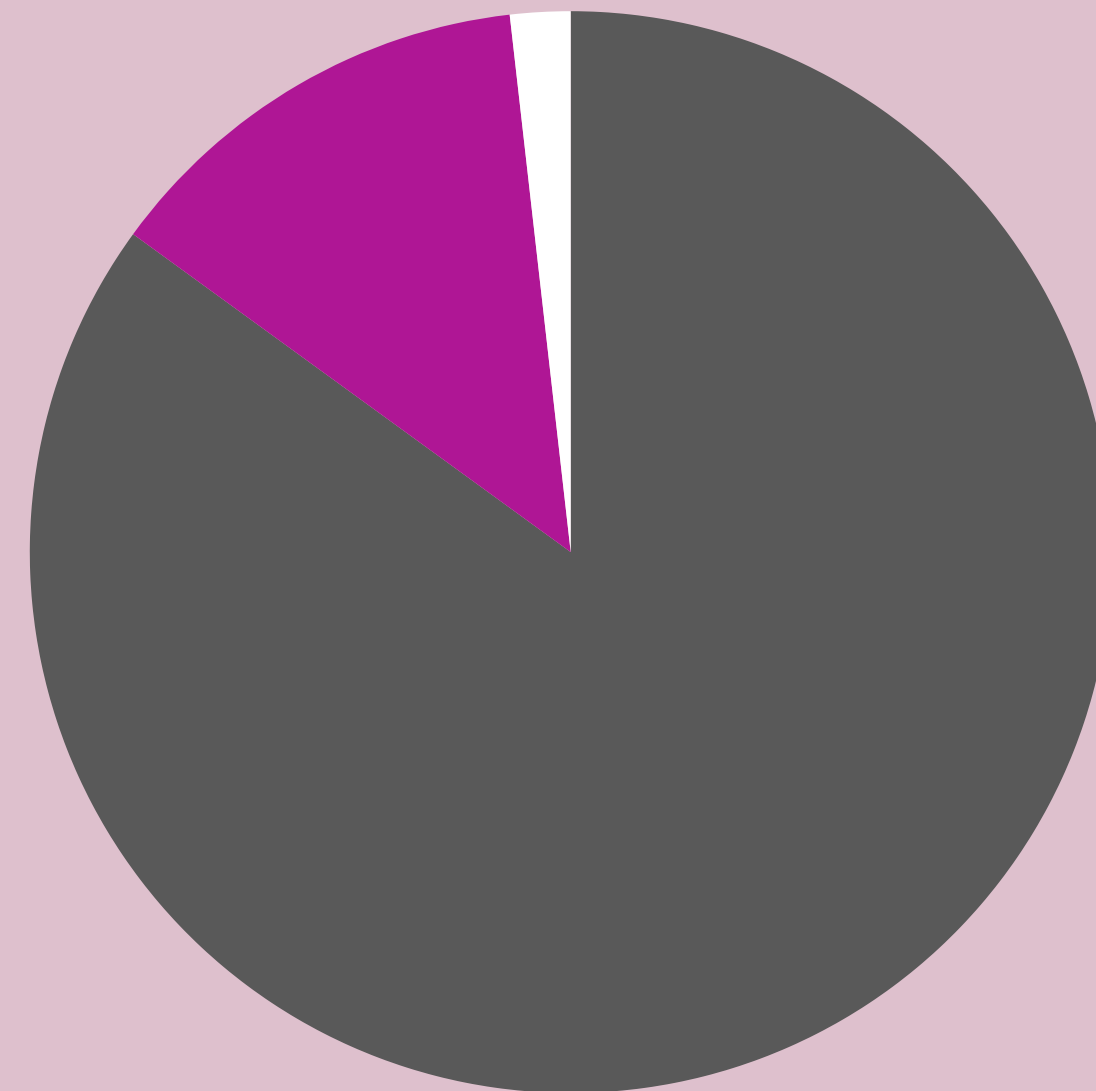

5. Ireland

6.88

...movies by

535 directors

female directors
13.2%

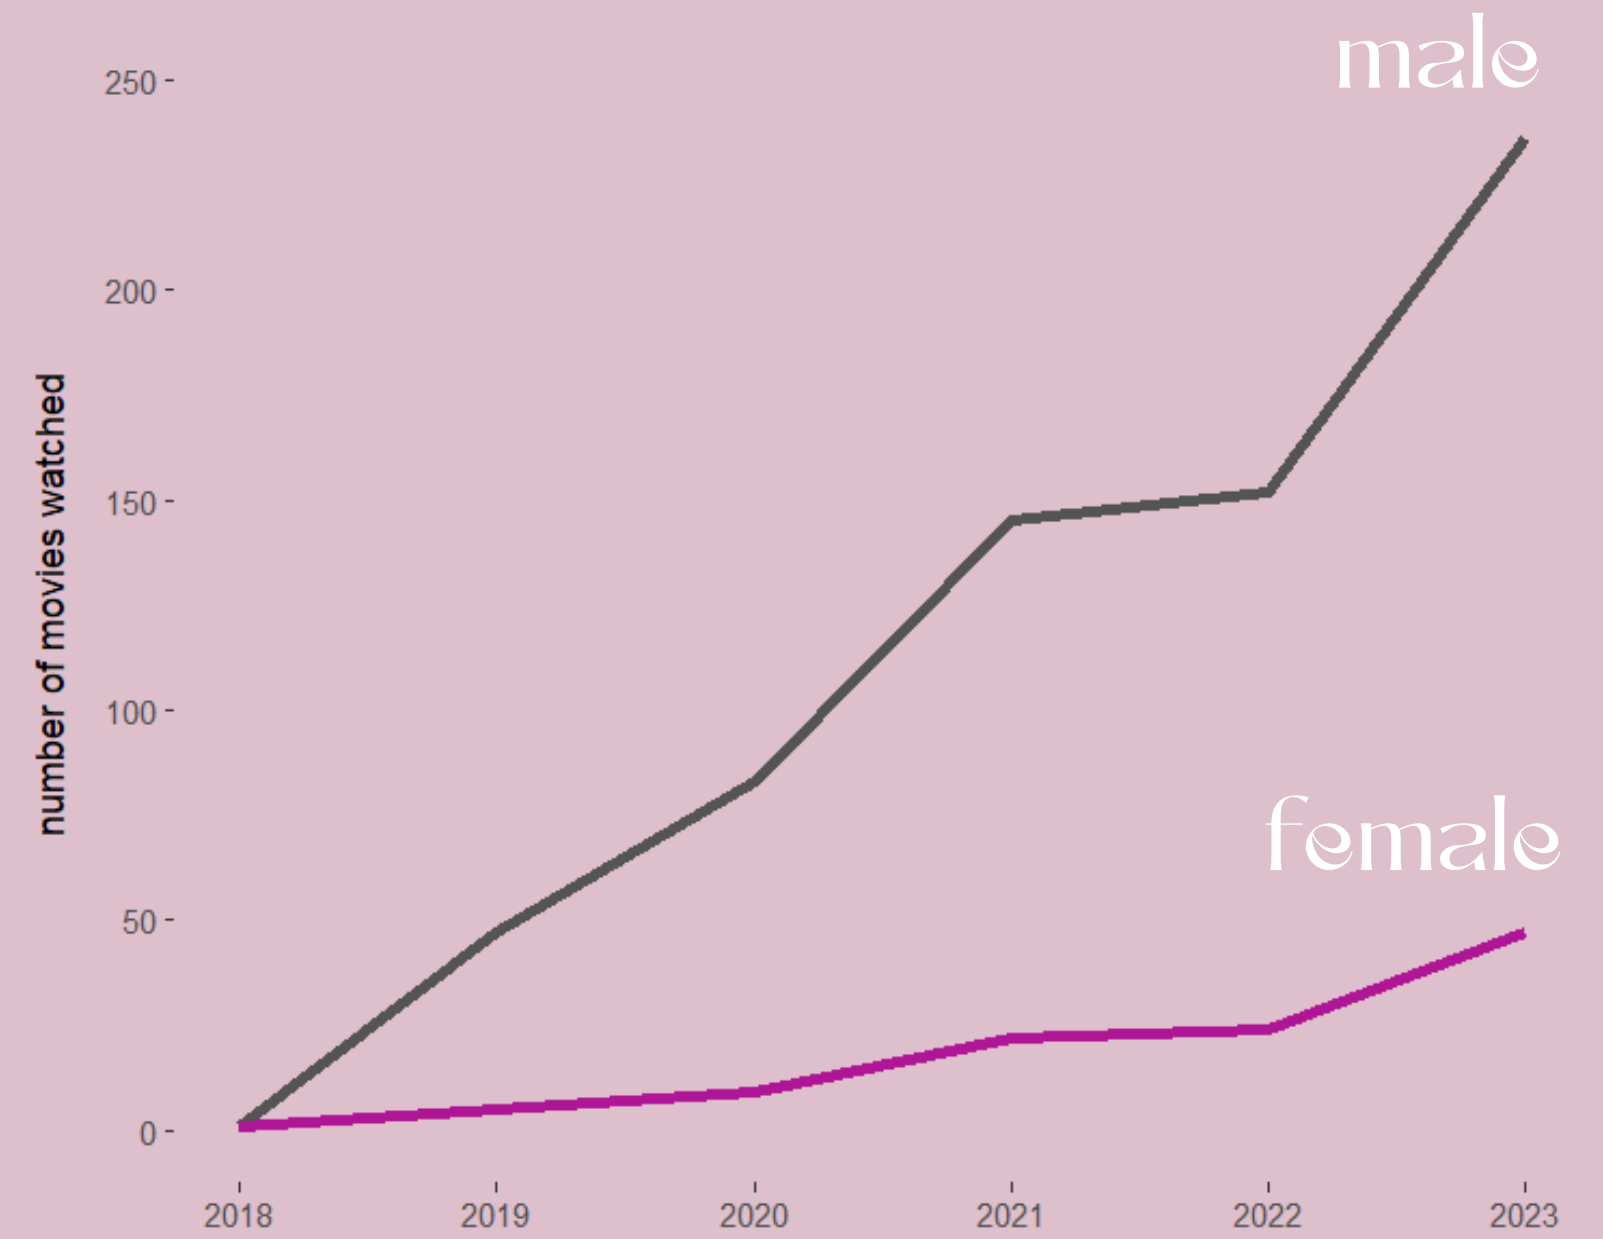

male directors
85%

growth of the # of movies watched

total

by dir.'s gender

avg. ratings of BOTH female and male
directed movies are 6.7

but the numbers
of observations
in those samples
are so different!
is this statement
valid?

yes! according to the
Mann-Whitney test.
But before that I
checked the norma-
lity of distributions
and variances

most watched directors

	#
1. Wes Anderson	11
2. Martin Scorsese	10
3. Woody Allen	9
4. Krzysztof Kieslowski	8
5. Quentin Tarantino	8
6. David Fincher	7

highest rated* directors 🏰

1. Greta Gerwig	8.33
2. Damien Chazelle	8
3. Martin McDonagh	8
4. Sam Mendes	8
5. Quentin Tarantino	7.75
6. Stanley Kubrick	7.5
